AV Group launches new Fund for investing in climate technology, including hydrogen

AV Group Sarl (AVG), a Luxembourg based asset manager, has launched the Nordic ESG and Impact Fund SCSp (the Fund), which focuses on investing in climate technology and climate infrastructure. AVG has successfully obtained its anchor investors from Japanese-based institutions focused on an ESG and Impact mandate. The Fund's goal is to invest in Nordic-based growth equity companies focused on smart city/society, cleantech, ocean space tech and other climate-related investee companies and scale their operations globally. The Fund is also focused on new energy infrastructure technology such as EVs, batteries, anaerobic digestion, hydrogen, hydro solutions, and other emerging energy infrastructure solutions. The Fund will start to deploy capital starting during February and has a robust pipeline of companies to invest in.

GEV successfully raises AU\$6.3 million via a share placement

Global Energy Ventures Ltd, the developer of compressed marine solutions for gas (CNG) and hydrogen (C-H₂), has obtained commitments to raise AU\$ 6,300,000 (before costs) via share placement (Placement) to institutional and sophisticated investors. The Placement is a way of the issue of 63,000,000 fully paid ordinary shares at AU\$ 0.10/share raising a total of AU\$ 6,300,000 to new and existing institutional and sophisticated investors. The issue price of the shares under the Placement represents a 20% discount to the last traded price of AU\$ 0.125/share and an 18.2% discount to the 15-day volume-weighted average price of AU\$ 0.123. Proceeds of the Placement will be used for CNG Optimum business development, development of the C-H₂ compressed hydrogen supply chain, offer costs and ongoing working capital.

Universal Hydrogen announces the addition of key personnel and investment

Universal Hydrogen Co., a hydrogen aviation startup, today announced that it appointed Rod Williams as Chief Commercial Officer. Williams is an industry veteran with extensive aircraft commercial operations experience, having served in a variety of high-level roles at Bombardier, including Vice President of Marketing and Vice President of Regional Programs.

Universal Hydrogen also recently secured an investment from Trucks Venture Capital. With this financing, Universal Hydrogen is scaling up its engineering team in Los Angeles, building full-scale gaseous and liquid hydrogen modules, and testing an “iron bird” prototype of a fuel cell powertrain suitable for regional and eVTOL applications—all by Q2 2021.
